

ELECTRIC **RANGER**

GREAT RELIABILITY | EASY TO OPERATE | EASY TO MAINTAIN

JBT electric Ranger cargo loader offers zero emissions and lower operating costs with available maintenance free batteries. Providing reliable loading to help you achieve "the perfect turn".

High speed aircraft loader

Today's airports are larger, with more spread out operations than ever before. Operation Managers need the equipment where the work is. With its higher drive speed, a single Ranger can do the job of multiple traditional loaders.

- Top speed of 24 km/h (15 mph) with high speed package
- Suspension on front axles and optional suspension on bogey wheels, to reduce impact from rough ramps at higher speeds
- Small footprint and tight turning radius

Easy to operate and maintain

The Ranger builds on JBT's large installed base of loaders. Operators and mechanics that are familiar with JBT loaders will feel right at home with the Ranger.

- Familiar controls layout and operation
- Industry leading on-board diagnostics with intuitive LCD display.
- Quick and easy maintenance access to key components from the side of the loader.

Legendary JBT reliability

The choice of components is a key element in long-term reliability. JBT has selected top-of-the-line components to ensure reliability, durability and availability of parts and service when needed.

- Structural design was optimized using latest design tools and extensive testing.
- High quality components, including IFM controls and Danfoss hydraulics
- Supported by JBT's worldwide customer care network
